-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/17/2007 has been entered. Claims 29-30 are newly added for examination. Claims 1-28 are cancelled.

Response to Arguments

Applicant's arguments with respect to claims 29-30 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2152

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 29-30 rejected under 35 U.S.C. 102(e) as being anticipated by

Goldszmidt et al (us pat 7,054,943) (hereinafter Gold).

As regarding claim 29, Gold discloses urging a user to input a service level condition (see Gold col.1, lines 35-44, SLA between the customer user and the server) including at least an upper limit number and a lower limit (see col.2, lines 13-15, min and max server resources) number of the computers to be allocated to the user (col.3, lines 4-5, number of servers to be allocated), and a threshold level of a load condition of computers allocated to the user (see col.3, lines 30-45, keep the server resource utilization between 50 to 80 percent); allocating an initial number of computers to the user and starting processing of requests from the user with the allocated computers (see col.2, lines 47-51); monitoring a load condition of the computers currently allocated to the user to compare with the threshold level of a load condition (col.3, lines 30-45); and if a monitored result indicates that the computers currently allocated to the user are overloaded in comparison with said threshold level, the number of the computers currently allocated to the user is smaller than the upper limit number, and there is at least one idle computer in the computer system, allocating at least one of said at least one idle computer to the user (col.3, lines 30-45; lines 60-67, allocate additional servers to the customer if the utilization below the lower bound when free resources are available) .

As regarding claim 30, Gold discloses if the numbers of the computers currently allocated to the user is larger than the lower limit number, and the monitored result indicates that the load condition of the computers currently allocated is under a level at which a reduced number of computers can afford to share a current load, dedicating at least one of the allocated computers to be idle (see col.3, lines 60-67).
